## The boots built from the ground up: Carhartt durability, quality and craftsmanship translates directly to our line of work boots, built to keep you dry, comfortable and safe during your workday.

**S3**

Carhartt safety shoes are of the protection class S3; offering stability, comfort, and lightweight flexibility to all craftsmen. In compliance with the requirements of the EU standard, EN ISO 20345:2012, the S3 shoe offers a fiberglass toe cap that protect against falling objects and the indentation resistance is at least 200 Joules. The S3 shoe also has antistatic properties, increased resistance of water, non-slip Vibram® sole, and anti-perforation that protects the soles of the feet from sharp objects.

**S1P**

Carhartt Safety shoes of the protection class S1P; offer stability, comfort, breathability and lightweight flexibility to all craftsmen who work indoors or with no risk of water sprays. In compliance with the requirements of EU standards, EN ISO 20345:2012, the S1P shoe offers a fiberglass toe cap that protect against falling objects and the indentation resistance is at least 200 Joules. The S1P shoe also has antistatic properties and anti-static perforation that protects the soles of the feet from sharp objects.

**FT**

Identifies protection against impact and compression hazards with a fiberglass toe, taking up to 200 joules of force. The lightest toe cap with an ergonomic shape specially designed to adapt to any type of foot, this will ensure comfort and a high precision fit. The Fiberglass Toe meets EN ISO 20345:2012 standards.

These shoes are designed to be completely waterproof and to keep your feet dry in most types of wet conditions. A waterproof and breathable membrane is used to keep you feet dry and warm while wicking moisture away from the foot and promoting air flow and circulation.

Rugged Flex® gear meets Carhartt's defined standards for stretch and recovery to give you extra range of motion so you can move and work easily in Rugged Flex shoes. This can be found in the construction of the sole and the composition of the materials used in the anti penetration textile plate and non metallic thermo palstic polymer shank. These elements provide protection and support whilst both being pliable enough to suit the wearers needs in the work place.

The Scuff cap offers more durability to a popular wear point on the shoe. It provides long term protection to your shoes without adding extra weight.

Performance shank provides extra stability.

These shoes are designed with lightest weight materials, to provide a lightweight fit to help keep you strong throughout your work day.

The Anti-perforation plate has anti perforation properties which protects against penetration of sharp objects.

Vibram® outsole provides performance with a non-slip antistatic compact polyurethane sole for the intended work and environment. The outsole also has resistance to heat, abrasion, oil and ammonia.

ADDITIONAL  
INFORMATION

# CARHARTT WOMEN'S SIZE CHART BODY MEASUREMENTS

	Suggested Size	X-Small			Small			Medium		Large		X-Large	
		2	4	6	8	10	12	14	16	18			
<b>Bust</b>	Inches	33	34	35	36	37	38.5	40	41.5	43.5			
	CM	84	86	89	91	94	98	102	105	110			
<b>Natural Waist</b>	Inches	27	28	29	30	31	32.5	34	35.5	38			
	CM	69	71	74	76	79	83	86	90	97			
<b>Hip (Seat)</b>	Inches	36	37	38	39	40	41.5	43	44.5	46.5			
	CM	91	94	97	99	102	105	109	113	118			

- For Outerwear, Bibs, and Tops: If you prefer a slimmer fit or are between sizes, try sizing down.
- For Bottoms: If your measurement falls between sizes, buy the larger size.

## HOW TO MEASURE

### Bust:

Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

### Natural Waist:

Bend side to side and find the natural bend in your body; this is your natural waist.

**Note:** It may not be the smallest point.

### Hips:

Measure the fullest part of your hips, approximately 8" below the natural waist.

### Inseam:

Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.

**For best results, measure over your undergarments.**

## WOMEN'S SOCK CONVERSION CHART

SHOE SIZE			SUGGESTED SIZE
US	EUROPE	UK	
3,5 - 5	35 - 37	2,5 - 4	SMALL
5,5 - 11,5	38 - 41	5 - 7,5	MEDIUM
9 - 12	42	8	LARGE

## PANTS INSEAM LENGTH CHART

Regular
Inseam Measurement: 31"-32"

## WOMEN'S TOPS FIT

Relaxed Fit	Loose Fit
Slightly loose for a comfortable fit	Roomy for a comfortable fit
Subtle shape for range of motion	Allows for maximum range of movement

## WOMEN'S PANTS FIT

Fitted	Loose Fit
Mid-rise sits just below the waist	Mid-rise sits just below the waist
Closest fit through hip and thigh	Easy fit through the hip and thigh
Close to the body, but never too tight for work	A classic look you can wear anywhere and everywhere

## BIB OVERALL (UNLINED)

STYLE #: 102438

- Size to the largest part of your body
- Reference the inseam length chart and body measurement chart for guidance
- Measurements assume bib overall is worn with a shirt and undergarments. If you plan to layer over pants, you may need to size up.

# CARHARTT MEN'S SIZE CHART

## BODY MEASUREMENTS

Measure your body and order correct size

### HOW TO MEASURE

For best results, measure over your undergarments.

#### Chest

Measure fullest part of your chest, keeping the tape level to the floor.

#### Waist

Measure your natural waist where your torso is the smallest.

#### Hips

Stand with heels together and measure the fullest part of your hips (approximately 8" below the natural waist).

#### Inseam

Measure pants that fit you well. Lay them flat, with the front and back creased smooth. Measure along the inseam from crotch to bottom of leg hem. Or, if you don't have pants that fit comfortably, measure from your crotch to your desired pants length.

### MEN'S SOCK CONVERSION CHART

# TECHNOLOGIES

This technology wicks moisture away from the body to the outside of the garment. Next to this sweat wicking feature, extra features specified per Carhartt Force® could be: • Stain Breaker® technology releases stains • Anti odor • FastDry® faster drying • Carhartt Force® is a technology, not a fabric.

Force Extremes® is our lightest-weight, fastest-drying, odor-fighting gear. It's powered by 37.5® Technology, which is scientifically proven to give you more stamina. Force Extremes® keeps you dry and comfortable so you can end the day as strong as you started.

A durable water repellent finish to let water slide off the surface of a garment.

Waterproof breathable protection.

A technology to keep you extra warm when it's cold outside. The microfibers in the insulation capture air in the material so that there is more space between the outside and the body. Thereby, the body is better protected against cold outside air. 3M and Thinsulate are trademarks of 3M

A finish that allows stains to wash out easily.

FastDry® wicks away sweat and moisture from the fabric to help promote faster drying.

Wind Fighter™ is a technology that prevents wind from blasting through the fabric and reaching your skin.

Rugged Flex® gear meets Carhartt's defined standards for stretch and recovery to give you extra range of motion so you can move and work easily in Rugged Flex garments.

Full Swing™ products include Rugged Flex® technology and engineered design to provide an improved range of motion without the bulk and weight.

Provides a high level of engineered outsole for grip, durability for a wide range of work and safety environments, with excellent heat and tear resistance.

## DISCLAIMER

Our aim is to serve and protect hardworking men. Every attempt has been made to ensure accuracy of the product descriptions/colours in this catalogue at the time of printing. Please note that printed colours displayed in this sales tool may vary from the product colours. Our products and sketches shown in this catalogue are represented as accurately as possible, however we reserve the right to change product specifications or colours without previous notification.

## SHELL FABRIC

---

### Firm Duck

Our strongest cotton duck is the most durable canvas out there. Built with added toughness, firm duck is water-repellent, wind resistant, and rugged. If you like to break in your jackets and pants, firm duck is for you.

Find it in gear like our Firm Duck Chore Coat.

### Duck

Good 'ol duck is stiff, ring-spun cotton. If you like your Carhartt solid, classic and durable as the day is long, this is the duck for you.

Find it in gear like our Duck Detroit Jacket and the Duck Bib Overalls

### Washed Duck

If you like sandstone duck, you'll like our washed duck. This fabric feels exactly like it sounds—we took our durable, classic duck, and washed it for a broken-in look and feel. It breaks in faster than duck, and looks newer, longer.

Find it in gear like our Full Swing® Armstrong Jacket.

### Sandstone Duck

Sandstone duck is sanded and brushed for softness and comfort. The more you wear it, the more it breaks in—it's comfortable the first day you put it on and more comfortable and worn-in on the 50th.

Find it in gear like our Sandstone Active Jac and Mock Neck Vest.

### Quick Duck®

Quick Duck® is durable, and lighter than traditional sandstone duck. It's built with a durable water repellent, so water beads up and rolls off, and it doesn't require breaking in like sandstone—so your gear will always look fresh.

Find it in gear like our Quick Duck Full Swing® Cryder Jacket .

### Rugged Flex® Duck

Rugged Flex Duck gives you the classic Carhartt look, with just the perfect amount of stretch. Made by combining our famous cotton Duck with Rugged Flex® durable stretch technology, the result is increased ease of movement everywhere it's needed, and our most comfortable heavyweight gear yet.

Find it in gear like our Stretch Duck Dungaree Trousers .
